

Track resident and visitor activity with **Guest Verification System**SM

*Solutions for a Safer World*TM

*Keeping gated communities secure from unwelcome visitors, while promoting a carefree environment for residents and their guests, can be challenging. Andrews International's **Guest Verification System**^{SM*} provides a welcome solution.*

When customers expressed a need for a verification system in their gated residential communities, Andrews International (AI) responded with **Guest Verification System**SM (**GVS**SM), a tool specifically developed to improve the visitor management process for gated residential communities. **GVS**SM is available FREE to Andrews International clients and can be integrated into nearly any PC with no additional hardware or software.

Key Features of GVS

- **GVS**SM maintains a database of all residents and pre-approved visitors and a log of visitors entering the community.
- **GVS**SM expedites the visitor entry process in several ways:
 - Auto dials the resident when the security officer needs authorization for a non pre-approved visitor
 - Allows pre-approved visitors to enter the property without the security officer having to contact the resident
 - Prints a parking pass for each visitor, containing valuable information for parking and roving patrols
- Community managers can edit resident data and add pre-approved visitors from their computers without visiting the gate

- **GVS**SM reports list all residents and their visitors, including a log of each visitor that has entered the community.
- **GVS**SM helps prevent the entry of banned persons by maintaining a list of restricted visitors for each resident.
- Each time anyone visits that resident, an alarm screen warns the security officer to check the banned persons list and ensure the visitor is not on it.

Benefits to Residents

- **Improves safety** – through effective deterrence, documentation, and reporting of unauthorized individuals attempting to gain access
- **Enhances communication** – with centralized system prompting compliance with visitor documentation requirements
- **Improves process times** – and reduced delays and lines for regular visitors
- **Projects more professional image** – Eliminates illegible handwritten visitor logs and creates a customized visitor pass
- **Supports effective management & oversight** – through creation of an accurate digital record that's searchable by name, check-in/out time, and resident visited

**Offered through technology partnership with U.S. Security Associates, Inc.*
