

Manage parking fees plus rewards, tolls, and more with **Park+**

Solutions for a Safer World™

Andrews International (AI) offers Park+, a sophisticated solution that makes parking and toll fee management simple.*

Through an easy user interface, administrators enter parking or toll fees into the **Park+** system, based on flat rates, duration, or other standards. The administrator can also set up “rewards” reflecting credit for on-site purchases or other discount criteria.

Drivers collect a Park+ parking pass or ticket at the point of entry. Upon exit, the parking attendant scans the pass and enters rewards credit at sites where rewards are offered. **Park+** automatically calculates the

fee due. System administrators can easily generate reports by shift, personnel, time period, or other system data.

Brought to you by the security company known for ground-breaking, internally developed technology systems, **Park+** is the top security company endorsed solution for management of parking fees, roadway and ferry tolls, and other entry/exit fee applications.

Park+ is the product of thousands of man-hours of research and development, the upfront involvement of global security personnel, and input from leading industry access control providers. This technology was released in 2002 and has processed millions of transactions through its software.

Site Configuration:

Location Name:

Location Desc:

Parking Fee:

Free Hours:

Lost Card Fee:

Criteria Settings:

Description	Condition	Criteria Value
